HAYTHEM BEN HADDADA

Frontend Developer and 3D Modeler

Sousse, Tunisia | +216 29 006 811 | haythem.haddada@outlook.com
Portfolio: haythem-portfolio.web.app

Professional Summary

Frontend developer and 3D modeler specializing in cinematic websites and interactive product configurators. Delivers complete projects from Figma design and original Blender assets to responsive Next.js interfaces, scroll-driven storytelling and performance optimization. Also develops games with Unreal Engine and Unity.

Technical Skills

Frontend: Next.js App Router, React, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
Interaction: Framer Motion, scroll-driven animation, 3D configurators, 360-degree product viewers
3D production: Blender, product modeling, PBR materials, HDRI lighting, rendering, camera animation
Design and delivery: Figma, responsive UI, reusable components, asset optimization, SEO metadata
Additional tools: Unreal Engine 5 Blueprints, Unity 6, Photoshop, Illustrator, After Effects

Selected Projects

Store 2000 | 3D Product Configurator | store2000.fr/simulateur
Designed the interface in Figma, modeled and rendered shutters in Blender, and developed the JavaScript configurator, including 360-degree viewing, installation modes, color and dimension controls, and opening animations.

RKTEC Solution | Cinematic Agency Website | rktec-solution.com
Created the Figma designs and original Blender 3D assets, then developed the complete Next.js website with scroll-driven storytelling, animated transitions and responsive layouts.

RIGAT | Cinematic Product Website | rigat.vercel.app
Designed the Figma layouts, produced Blender product models and camera animation, and developed the Next.js experience with synchronized scrolling, model selection, mobile interactions and optimized image loading.

BMN Metal | Responsive Service Website | bmn-metal.essuivi.com
Designed the website in Figma and developed its Next.js and Tailwind CSS frontend, service pages, quote forms, Framer Motion product selector and dedicated mobile layouts.

Panço | Interactive Fashion Website | panco-phi.vercel.app
Designed the interface in Figma and developed the Next.js website, including outfit selection, animated pricing, responsive product layouts and transitions.

Équipe Baie | B2B Manufacturing Website | equipebaie.rktec-solution.com
Designed the Figma layouts and developed the complete Next.js frontend, including product, workshop and service pages, reusable components and responsive navigation.

Additional Experience

BEVEKY GAMES | Solo Game Developer
Released ALWAYS: ILL in Steam Early Access in May 2025. Built gameplay, puzzles and atmosphere with Unreal Engine 5 Blueprints; refined performance and usability using player feedback.
Steam: ALWAYS: ILL
